attend2IT
EVENT IT SOLUTIONS

attend2IT provides a comprehensive suite of tailored services designed to support the event industry. These include Wi-Fi, CCTV Services, live streaming and video, virtual event solutions, and custom web development.

Since 2009, attend2IT has specialised in delivering top-tier event Wi-Fi services within the event sector. Over the years, we've established a strong track record and a solid reputation for providing dependable connections across a wide range of settings.

Event Wi-Fi

Lease line Fibre

Starlink

4G/5G unit

Satellites

Temporary Internet Solutions

The primary challenge often lies in establishing a connection to the event site. Based on your event's specific requirements, budget, and timeline, we offer a diverse array of options to accommodate your needs.

Leased Lines

If the time and budget is there - we favour having a leased line installed onsite. Depending on location we can offer speeds of up to 10Gbps via this service.

WISP

Depending on the circumstances and available time, we may utilise a low-latency wireless connection to one of our nearest Points of Presence (POPs). This approach can provide a rapid turnaround for connections ranging from 100 Mbps to 5 Gbps.

4G/5G

Though not always appropriate for the bigger events, this is still a highly efficient option. Our 5G units load balance across multiple UK networks to deliver the fastest speeds and most reliable connection possible. Additionally, we offer a wide variety of roaming SIM cards that work seamlessly so you can stay connected wherever you are in the world!

Satellite

We have a large stock of Starlink and Tooway satellites. Providing contended and leased services with high availability at lower prices.

Distribution

Once the internet connection is established on-site, we will distribute connectivity to designated areas tailored to their specific needs. This distribution will be customised based on the importance of each area and the necessary bandwidth requirements, ensuring optimal performance for all attendees. Whether it's for high-traffic zones or specialised sessions,we've got you covered to deliver a seamless internet experience throughout the event.

Wireless Links

In the temporary world this can be the easiest way to get conneectivity around site. We use 5Ghz, 60GHz, 70GHz and 80GHz links depending on distance, speed and reliability required.

Wi-FI

Typically the final stage of our distribution - providing Wi-Fi access to end users. As Ruckus Silver Partners, we offer a wide range of access points from Wi-Fi 5 to Wi-Fi 7, allowing us to deploy the most suitable solution based on your specific needs. This ensures robust connectivity and an exceptional user experience regardless of the scale of your event.

Fibre and Copper

We offer a variety of connectivity options to network event sites. For site backbone and mission critical connections, we recommend running internal fibre cabling to ensure throughput and uptime. Fibre can support speeds up to 10Gbps over 5km. For shorter runs we can run CAT5 / CAT6 copper. A economical solution which is quick to deploy and replace. 100% recycable - we ensure all left over copper is disposed of sustailably if it can't be used on our next event.

Wireless Link

Outdoor Wi-Fi

Running Copper

Fibre Cab

Streaming & Video

Why Stream?

Minimise travel expenses and reduce your carbon footprint by streaming your conference globally. With the increasing prevalence of video conferencing, multiple viewers can effectively engage with complex content through synchronised broadcasts, enhancing the overall experience for attendees.

Online Broadcasting

Recent advancements in broadcasting technology have reduced the price of live event video streaming, which is an essential component that may significantly enhance your event. Attend2IT specialises in providing high-quality IP broadcasting from camera to viewer, but we are also happy to provide part of the service and link to your current CDN or camera provider.

Video Conference / PTP Video

Joining two sites together is one of our customers' most frequent requests. Various approaches can be taken, depending on the quality and reliability required. Our extensive inventory of video conference equipment enables smooth two-way HD audio and video communication. These are a popular option that are inexpensive, easy to install, and compatible with our satellite links.

Virtual Events

Virtual Exhibtiton Platform

With registration, lead capture and a suite of smart features, Eventcaster offers everything you need to host a successful virtual or hybrid exhibition.

Our comprehensive platform ensures seamless engagement, allowing you to connect with attendees and exhibitors effortlessly. Experiance a new standard in event management with Eventcaster - where innovation meets efficiency!

Why use our EventCaster Platform?

Our EventCaster Platform is a reliable and secure solution that enhances the event experience for both organisers and attendees.

With our live voting feature, you can easily make key decisions within your organisation in real time.

Host a professional event, with multiple speakers and scale to thousands of attendees, while benefiting from the support of dedicated Project Manager who will work alongside you throughout the whole process to ensure the success of the event. We do the heavy lifting so you dont have to.

Hybrid AGMs

With the Hybrid option, there is typically one main venue hosting a live audience along with some members of the presenting team. We can seamlessly integrate remote presenters and stream a combination of both in-person and virtual content to a larger remote audience.

- 👍 Live Voting and Q&A
- 🌐 Recording of the event for playback
- 👥 Built-in registration
- 📊 Fully customisable site

TV & Film Studios

Studio installs is also a big part of what we do at attend2IT. We manage IT services across all OMA Studio Group film studios. With our deep understanding of the film industry's fast-paced nature, we excel at sticking to tight schedules, just as we do in the events world-giving us an advantage in providing our services in this field.

On Location

Beyond permanent studio installs, we also offer temporary networking solutions for on-location shoots worldwide. Whether you require internet at a unit base or reliable connectivity in a remote forest, we've got you covered. Our team will travel with your crew and stay on-site to provide dedicated supportthroughout the entire shoot.

OMA - X Studio

Picturehouse Central

Venue Wi-Fi Options

In addition to event services, Attend2IT provides permanent networking solutions for venues across the UK and Europe.

Tailored to meet your budget and timeline, we offer a choice between a flexible long-term rental plan or a maintenance-only contract where you purchase the equipment. Both options include full support and management of all systems.

Event CCTV

CCTV plays a crucial role in event management, enhancing security through crowd monitoring, ANPR, and traffic management. With attend2IT, we can easily install cameras anywhere your network is present, reducing setup costs.

CCTV can often be a costly addition to your event, but if we're already on-site providing services, integrating it into the existing network becomes a simple and cost-effective solution. This allows you to enhance event security without the added expense of a separate setup.

We offer a professional HikCentral security management software package alongside our hardware, providing real-time reporting and camera access across multiple events and devices. With features like email alerts, you can stay informed and in control no matter where you are.

All our technicians undergo specialised training from HikVision, giving us expert knowledge on deploying and optimizing their solutions for maximum effectiveness at your events.

Glossary

PTZ - Pan, tilt and zoom
Bullet - Compact, cylindrical, camera
Solar CCTV - Cameras without mains
ColorVu - Full colour 24 hours
Fisheye - Ultra wide-angle lens
Dome - Roof mounted sealed camera
ANPR - Automatic number plate recognition
IR Camera - Capture footage using infrared filter
HD CCTV Camera - Have resolution 750p up to 4K

Bespoke Web Development

In-house Development Team

At attend2IT, we develop all our software and custom web solutions in-house, giving us full control over the entire process. For larger events, a key developer will be on-site to ensure everything runs smoothly.

We seamlessly integrate additional services such as free Wi-Fi for app users, attendee location tracking, real-time traffic updates, e-ticketing, and event video streaming into our bespoke web developments. Once the infrastructure is in place, it's simple and cost-effective to add services to enhance your event.

Organiser portal

With the help of our Organiser Portal, you can take full control of your event. This easy-to-use website gives you a thorough overview of all we have to offer and lets you keep tabs on important details like which exhibitors have reserved Wi-Fi, how many people are there, and where they are located.

Furthermore, the portal seamlessly incorporates real-time updates from on-site weather stations, people counters and more. Providing insightful information to support your decision-making and guarantee the successful execution of your event.
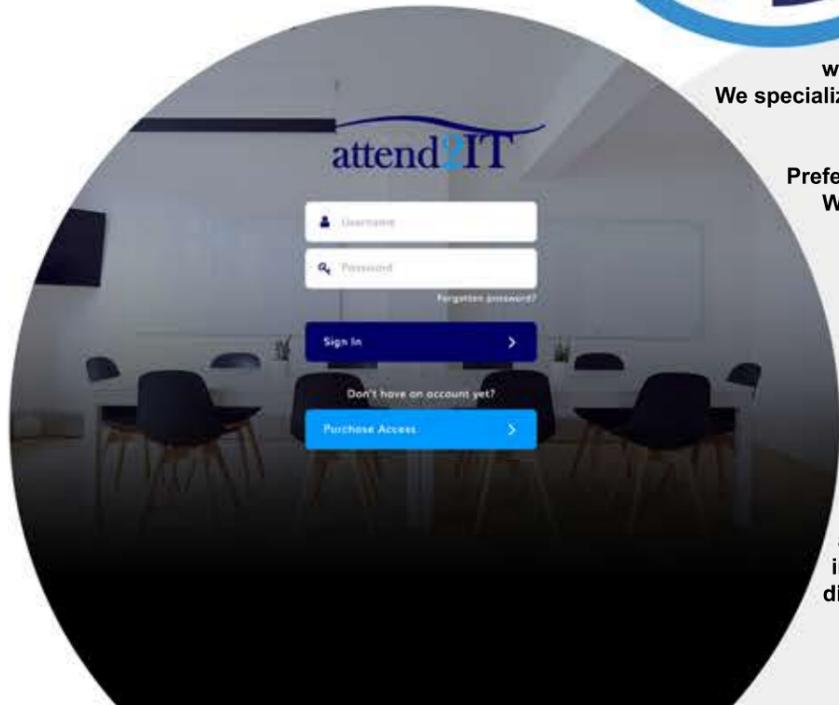

Website

Our in-house development team can create a brand-new website tailored to your needs or modify your existing site. We specialize in building custom solutions from the ground up using Angular, JavaScript, and HTML.

Prefer to stay current? We can also design your website using WordPress or another content management system (CMS), giving you the flexibility to make updates whenever you need. With our expertise, you'll have a dynamic and user-friendly website that meets your evolving requirements.

ExpoSync

Need help standing out in the exhibitor hall?

ExpoSync allows prospective clients to choose what aspects of your business they would like to learn more about. By interacting with our customisable touch screen interface, they can view videos, pictures or text relating to different areas of your business on a seperate large format display for all to see.

Scanning Technology

Our Scanning Technology

Ensuring efficient scanning is crucial for a successful event. Even a few seconds of delay per ticket can lead to long queues and frustrated attendees. Our in-house scanning solution, using Zebra TC25+ scanners, guarantees speed and reliability. Featuring built-in Wi-Fi and 4G capabilities, each device boasts a fast and dependable QR/barcode reader. Additionally, with a local database that syncs to a central server, our system effectively combats ticket fraud, providing peace of mind for event organizers and attendees alike.

Registration

Our high-speed printers are integral to our registration system, ensuring that your lines stay short. Each badge is printed on branded paper in just half a second, eliminating the need for non-reusable plastic wallets by incorporating a convenient hole at the top.

Reservations can be easily made through our user-friendly registration platform, or you can opt for integration with a third-party service. We offer real-time interface capabilities with popular platforms like Bizzabo, as well as support for CSV uploads.

For exhibitors, information can be efficiently gathered using an Opticon scanner, streamlining the entire process for a seamless event experience.

The Great Escape

📅 **4 DAY EVENT**

📊 **HOSTS 500 BANDS**

🏢 **30 VENUES ACROSS THE CITY**

🎉 **15,000 VISITORS**

🖨️ **4,000 DELEGATE BADGES ARE PRINTED**

We provide site wide Wi-Fi coverage at The Beach for the production team, artists and brand activations. Cabled connections are installed at the bars and trader stands for the cashless system that is in place.

For the 2023 event, we were tasked with providing a dedicated line in Jubilee Square for the broadcast of the Kings Coronation which coincided with TGE. For the festival itself, we provided connectivity here for the Box Office, Wristband Exchange and the pop-up bars and traders in the square.

The hotel is the main hub for the conference side of the event. Working alongside the hotel, here we provide connectivity for the main organisers office, event control and media suite. Our badge printing system is also deployed in the main lobby for delegates to collect their event passes.

> 66
>
> **Thanks so much for all your help across TGE! Hope all the rest of your events go smoothly this season and we will see you next year!**
>
> **Justine Abraham, Festival Ticketing Manager, Festival Republic.**

Brighton Pride

📅 **2 DAY EVENT**

👥 **50,000 VISITORS**

📍 **SPLIT ACROSS 2 SITES**

📶 **OVER 120+ ACCOSS POINTS**

📹 **FULL CCTV COVERAGE ACROSS BOTH SITES**

▦ **OVER 50,000 TICKETS SCANNED**

Described by The Guardian as "the country's most popular LGBT event", the Brighton Pride Festival is a vibrant celebration of all that is wonderful about Brighton & Hove's diverse community, with visitors from across the globe enjoying its spectacular celebrations.

attend2IT offer a range of services at the event which has now become a regular part of our calendar.

The Event is split across multiple sites. Old Steine offers 2 all night parties as well as a large Box office where you can exchange your tickets and resolve any queries with your ticket.

Pride in the Park festival on Preston Park is a glittering and truly inclusive community celebration that delivers an unforgettable day of Pride. Followed by LoveBN1Fest which celebrates everything Brighton and Hove and brings all our communities and Rainbow families together for an afternoon of fun on the park.

> 66
>
> **Having changed to attend2IT in 2018 we increased ourrequirements for WiFi, CCTV and ticket scanning for 2019 and have been really pleased with the results.**
>

OMA-X Film Studios

- **ALL 6 STAGES AND 2 OFFICE BLOCKS ARE FIBRE CONNECTED**
- **65+ RUCKUS ACCESS POINTS COVERING 224,00 SQFT**
- **80+ IP PHONES ACROSS THE OFFICE SPACES**
- **10GBPS LEASED LINE + A 400MBPS WISP BACKUP**
- **OMA-X IS LOCATED IN ENFIELD LONDON**

Established in 2020, OMA X is the largest single site within the OMA Studio Group and the biggest film studio inside London.

OMA X offers 6 fully soundproofed, high specification stages totalling 154,500 sqft, 31,500 sqft of multi-purpose support space and up to 27,000 sqft of production offices. The site's external footprint includes 207 parking bays in total and 94,000 sqft of secure yard space. The site covers 10 acres in total.

The 6 sound stages at OMA X range in size from 16,530 sqft to 41,106 sqft, with working height clearances across the stages of 44.5 ft.

Red Bull Soapbox Race

- **1 DAY EVENT**
- **OVER 60+ ACCESS POINTS**
- **SATELLITE BACKUPS**
- **ALEXANDRA PALACE, LONDON**
- **CCTV FOR EVENT CONTROL**

The Red Bull Soapbox Race - a thrilling one-day event held at Alexandra Palace, stands out as one of our team's favorite jobs.
Our partnership with Red Bull began in 2019 and we were thrilled to be back at Ally Pally in 2024. Working alongside the incredible teams at Ops People and Red Bull, we provide Wi-Fi to Production staff across the site, dedicated connectivity to the OB & media compound, Wi-Fi at the ticket gates and CCTV cameras in key areas for event control.
The excitement and energy of the event truly make it a highlight for everyone involved!

> Attend2IT always deliver impeccable service, from their knowledge to their can-do attitude, they overcome any issues without hesitation and work closely with the team to ensure a smooth connected event. They provided us with fast site-wide coverage, CCTV for key operational purposes as well as office infrastructure. We love working with the team at Attend2IT!
>
> **Bethan B - Ops People**

2 DAY EVENT

EUROPE'S LARGEST OUTDOOR RAIL PLANT SHOW

OVER 120+ EXHIBITOR WITH CONNECTIVITY

SPONSORED GUEST AND ORGANISER NETWORKS ACROSS SITE

5,000 VISITORS A DAY

EXHIBITOR BOOKING PORTAL

SATELLITE BACKUPS

Rail Live is the only exhibition bringing together the entire rail industry in a real railway environment. It is held at Long Marston Rail Innovation Centre. The site is large and until recently had little to no site infrastructure.

Attend2IT have been providing connectivity for the organisers and trade stands at the show since 2018. Until this year connectivity has been provided by a balance of satellite and FTTC connections, in 2022 we will be providing backhaul via a leased line for the first time.

We provide exhibitor, guest and organiser networks across the site, using a mix of wireless and conventional cable/fibre links. The primary connection is provided via the sites leased line, with FTTC and satellite backup systems, with all core switches backed by UPS, ensuring no down time in the event of power or fibre outage.

> " Just to say many thanks for the staff out on the site. It was extremely hot weather but they kept dropping by to check things were going okay. Much appreciated.
>
> **Michele Convill Exhibitor**

4 DAY EVENT

55+ ACCESS POINTS

FIBRE LEASED LINE

500 CONCURRENT USERS

120 PAYMENT DEVICES ONLINE

BACKUP SATELLITE

Gone wild is the ultimate family adventure, and celebrated its first year at Holkham Hall in 2024. It's is a celebration of the outdoors, encouraging people to disconnect from technology and reconnect with nature, adventure, and each other. It's an opportunity to learn new skills, experience the beauty of the natural world, and create lasting memories in a supportive and fun environment.

Gone wild is a cashless festival, so solid Wi-Fi and backhaul are imperative. We distributed the leased line from Holkham Hall, backed up with multiple low latency satellites, across the festival site. To ensure the highest possible up time on site and reduce the risk of cable damage, wherever possible we worked with the site to fly or trench all cabled connections, wherever practical.

The site needed to cater for a number of production users, whilst also being able to remain robust for the concession and gate payment and scanning devices. A robust solution and access control was essential. Instead of a traditional SSID and password, which can easily be abused and flood the network, we used 802.1x (WPA2 Enterprise).

> " You guys were fantastic as always, really happy with everything.
>
> **Laurence Mulchrone**

The ARB Show

2 DAY EVENT

LOW LATENCY SATELLITE WITH REDUNDANCY

EXHIBITOR BOOKING PORTAL

50+ ACCESS POINTS

ARB brings together the entire tree care industry, the beautiful and fitting venue of Westonbirt Arboretum. Attend2IT provide connectivity for the organisers and trade stands at the show.

We provide exhibitor, bar and organiser networks across the site, using a mix of wireless and conventional cable/fibre links.

The primary connection is provided via low latency satellite, with all core switches backed by UPS, ensuring no down time in the event of power outage.

Exhibitor booking is through our pre-event portal, taking any administrative time away from the organiser and allowing the exhibitors access to expert help from the moment of booking.

> Fantastic experience! The Attend2IT team were Attentive, professional and super helpful. would definitely recommend and hope to be able to use their service again in the future!
>
> **Adam Watton**

Soul Town Festival

2 DAY EVENT

LOW LATENCY SATELLITE WITH 5G BACKUP

FULL CCTV COVERAGE

10,000+ VISITORS

We were tasked with providing reliable wireless connectivity across site for all the bars to accept payments, scanning at the entrances, connectivity in the organisers office and a dedicated satellite system for a live stream of the festival.

The backhaul was brought to site via a mixture of satellites and 4G. We then distributed 20+ access points across site to provide excellent coverage for all required areas.

Attend2IT have been working with the Soultown team since 2021 - it's become a favourite in the festival calendar!

> It was an absolute pleasure working with Ryan and the team at attend2IT. They saved the day many times!
>
> **Lucy, Soultown Organiser**
